

Network Transformation

Managed Network Services

Multinational food products corporation

Business challenges

- Struggling to achieve strategic vision of “Store of the Future”
- Aging infrastructure in need of reliable, secure and flexible upgrades across 2,500 store locations
- Need for mission critical implementation without operational disruption

The Solution

- Professional Service: Migration for seamless “Day 1” upgrades of all sites without service interruption
- Managed Services
- LAN and WAN environment
- Wireless Access (LTE Enabled Cisco router)
- Next-Generation Fire Wall
- Day 2+ project management and enhanced governance

Outcomes

- Unified vendor, 20% reduced costs
- “Network of the Future” transformation of all store infrastructure over an 18-month timeframe
